## Welcome to the CWL Newsletter

### ICTStore -

#### The relaunch of the only online store you'll ever need

Computerworld Wales are pleased to announce the launch of our revamped online store, [ICTStore.co.uk](http://ICTStore.co.uk).

With thousands of bargains covering all your ICT needs, you really should check it out. For even more attractive pricing, why not request a login by emailing your Account Manager or [kevinc@cwwales.com](mailto:kevinc@cwwales.com).

### Virtual Storage

#### IBM announces a fantastic new promotion on their Storwise V7000 offering.

Previously to virtualise existing storage, customers had to purchase licensing for the external arrays, per disk shelf, at an average cost of £7k.

IBM are now offering up to 10 external shelf virtualisation licences for EMC/HP storage at no charge when a customer buys a bare-minimum Storwise V7000 configuration (for a limited time), allowing customers to utilise their existing HP and EMC storage capacity in a virtualised storage environment with all the V7000 virtualisation functionality for **no additional licence costs**.

For further information on IBM's Storwise V7000 [click here](#) (PDF, 582KB)

### Secure USB Drives

With the increasing levels of confidential data being transported by USB Drives, there is a definite need to increase the security of these devices, which are being misplaced with alarming regularity. Computerworld Wales has teamed up with Integral, a leader in the field of secure USB drives, to bring a range of FIPS 140-2 and FIPS 197 certified devices to market.

Crypto Drive is one of the most secure USB Flash Drives available today. Sensitive data stored on the Crypto Drive cannot be compromised in the event of loss or theft. With its rugged design, military level security and intelligent software, Crypto Drive is the ideal choice for secure data storage. With capacities from 2Gb to 32Gb, there's a model to meet most requirements at a price which is far less than the potential fine which could be faced for such a loss.

For more information and pricing - [click here](#)

### LifeSize - The Meeting Room Just Got Bigger

Lifesize are pleased to announce that people on Skype will now be accessible from the LifeSize Passport directory, letting them connect with just one click. This partnership is another exciting example of LifeSize commitment to Unified Communications partnerships that make video collaboration truly universal.

## Lenovo's Enhanced Experience 2.0 for Windows® 7

### Optimize and improve system performance

The joint engineering between **Lenovo** and **Microsoft** has been revamped – the new version of our certification will help customers enrich their experience with Windows 7 even further.

- Utilizing Lenovo RapidBoot technology, Enhanced Experience 2.0 PCs have optimized system files, processes and hardware settings to achieve, on average, 20-seconds faster boot and shutdown times compared with non-optimized PCs

Available now on selected Lenovo ThinkPad Edge E420 and E520 Laptops

---

## Internet Explorer 9 Released

Microsoft has released version 9 of their ubiquitous web browser. IE9 promises faster browsing and significantly faster JavaScript, which is used for common web applications like e-mail.

---

## Turning Point - Turning responses into usable data

Have you considered the difference it would make if you were able to analyse the responses to questions during training sessions or promotional events? If not you may be missing out on a host of valuable information. Turning Point captures responses to questions in PowerPoint presentations through a simple handset, and allows you to view and analyse the results.

For more information on the Turning Point range and testimonials from a range of users, go to <http://www.turningtechnologies.co.uk/> or contact your Account Manager at Computerworld.

## Lenovo Edge 91z - The release of the All-in-One SMB Desktop

We are pleased to announce the launch of the Edge 91z desktop, Lenovo's first SMB premium All-In-One desktop and the first Edge desktop product.

The Edge 91zlt builds on the success of the ThinkCentre A70z All-In-One and will further secure Lenovo's leadership in the All-In-One segment. The segment is one of the fastest growing and already Lenovo are #2 worldwide in All-In-One shipments.

With a 21.5" HD LED display and a resolution of 1920 x 1200, the Edge 91z entry point is the Sandy Bridge Core i3 processor, Windows 7, 6 USB ports and a 2Megapixel webcam. With the introduction of an 80Gb SSD and a range topping Core i7 Processor, up to 8Gb RAM and an optional 1Gb ATI Discrete Graphics the Edge 91z is an amazing 2.5" thick body, the unit will appeal across the SMB and Corporate marketplace.
