

Introducing LG SuperSign

LG SuperSign is a Full HD Digital Signage solution designed to enhance the way you communicate with pupils and visitors to the school.

At the heart of the solution is a simple, easy to use system with user-friendly operating features making it easy for anyone to use. What's more you'll save time and money thanks to the solution's convenient functions.

Make paper communications a thing of the past and provide dynamic content to ensure information is absorbed and stands out in the crowd with the **LG SuperSign** solution.

Use digital signage to

- Welcome visitors
- Advertise facilities/resources to new parents
- Highlight latest information
- Showcase particular achievement by the school or an individual
- Highlight health & safety issues
- Display exam achievements and sports scores
- Promote out of school activities
- Ensure everyone is up-to-date with latest information
- Motivate pupils
- Improve information flow to staff, pupils, parents and visitors
- Proudly display video or photography to reflect your schools achievements

Easy Editing

LG SuperSign's content editor is simple to use.

LG SuperSign is easy to use and ultra efficient which means you don't need a degree in IT to use it. With sample templates tailored for the education market and simple operating features including 'drag & drop', you can create expert content quickly and conveniently.

Easy Update

LG SuperSign's remote content delivery permits you to manage your content quickly and efficiently.

LG SuperSign allows you to update your content no matter where you are. In LAN / WAN – equipped locations you can promptly deliver content to each of your displays, no matter where they are located.

Easy Maintenance

LG SuperSign's easy maintenance will save you time and money so that you can focus your attention on more pressing matters.

LG SuperSign's real-time monitoring and diagnostic system allows you to manage the system easily even from remote locations. The detachable NC1000 External Media Player is easy to remove from the unit. Furthermore, the internal NC2000 Built-In Media Player makes your signage look even slimmer and helps you maintain the system far more conveniently.
